Re: *Amendments To Claims In the External Rotor Gas Turbine, PPA App. No 60/273426, NPA No. 10/090260*

Dear Examiner:

Since I filed my nonprovisional application, a new patent on external rotor gas turbines was issued to Chamis, et. al. (6393831) and some of the claims in the original application are now overbroad and can be dropped. I therefore move to amend the claims. (See "Claims" enclosed).

Moreover, in my nonprovisional application I referenced the provisional application number, 60/273426 which contains the original drawings. I've also included another drawing (See FIG. 4 enclosed) which is better suited for publication than the first three drawings. Similar parts are numbered using the same system as FIG. 1 with 100 added to the numbers in the FIG. 4 drawing. For example, "nozzle" is "2" in FIG. 1 and "102" in FIG. 4.

Yours,

Bret Cahill
